

Description

- Anchor device designed to be fixed through an structural anchor on vertical, horizontal or inclined surfaces, such as walls, ceilings, roofs or any other structural element.
- It can be used in most work at height, however, it must be taken into account that this device provides a fixed anchor point, so the worker's mobility will be limited by the connection used between the fall arrest harness and the anchor device.
- Valid to use 3 people (2 simultaneous and 1 rescuer).
- Made of stainless steel.
- Ø16 mm, 70 mm opening.

Materials

- Stainless steel AISI 316

STANDARDS

EN 795 Class A (Anchor device)
CEN/TS 16415 (Technical specification)
